Overview

High-Performance Walk Behind Road Roller

This single drum walk-behind road roller is engineered for precision and efficiency in small to medium-sized construction projects. Featuring advanced hydraulic systems and ergonomic controls, it ensures operator comfort and safety while delivering consistent compaction results on asphalt, soil, and gravel. Its compact design and maneuverability make it an ideal choice for confined areas, pavement edges, and road maintenance tasks.

Technical Specifications

Model Comparison

Specification	Model JNYL58H	Model JNYL58R
Engine Type	Gasoline Engine	Gasoline Engine
Power (kW)	4.0	4.2
Weight (kg)	185	185

Hydraulic System

Hydraulic Pump Drive • Hydraulic Motor Drive

Key Features

Operational Benefits

- Deadman control and reversing protection for maximum operator safety
- Easy-reach controls for improved operator comfort
- Height-adjustable handle for simplified transport and handling
- Hydraulic system provides infinitely variable working speed
- Built-in cooling fan for continuous operation

Design Advantages

- Self-cleaning scrapers prevent dirt buildup
- Beveled drum edge eliminates surface marking
- Compact design for maneuvering in confined areas
- Thick drum shells for extended service life
- Removable corrosion-free water tank

Compliance & Quality

Certifications

CE, ISO 9001, SGS
