

Single Engine Oil Well Cementing Unit

This cementing unit is engineered for oil well operations, integrating a single engine and automatic mixing system. Its durable construction ensures reliability in challenging environments.

Overview

High-Efficiency Cementing Solution

The Single Engine Oil Well Cementing Unit is engineered for reliable performance in demanding oilfield environments. Featuring an integrated automatic mixing system, it ensures precise slurry preparation for consistent cementing results. Mounted on a heavy-duty truck chassis, the unit offers excellent mobility and accessibility for field operations.

Technical Specifications

Mixing System

Automatic Mixing

Model Number

GJC40-17

Engine Configuration

Single Engine

Chassis Type

Heavy-duty truck chassis
