

Single Flute Straight Router Bit

This router bit is designed with a single flute for maximum chip clearance. It excels in fast, free cutting and plunging applications.

Product Overview

Precision Single Flute Design

This single flute straight router bit is engineered for high-performance cutting in wood, plastic, and composite materials. Its specialized flute design provides maximum chip clearance, which effectively reduces heat buildup and ensures smoother, cleaner results during routing, grooving, and dadoing tasks. The tool's construction is focused on durability and longevity, making it an ideal choice for both professional routers and CNC machinery setups.

Technical Features

Primary Applications

- Routing
- Grooving
- Dado cutting
- Rabbeting
- Plunging

Material Composition	High-Speed Steel, Carbide
Suitable Materials	Wood, Plastic, Composite Materials

Design Specifications

Geometry Parameters

- D (Diameter)
- H (Cutting Height)
- L (Overall Length)
