Product Overview

High-Performance Cutting Precision

The Single Flute Straight Router Bit is engineered for precision woodworking, featuring a Tungsten Carbide Tipped (TCT) cutting edge for superior durability and wear resistance. Its single flute configuration is optimized for efficient chip evacuation, ensuring clean cuts across hardwoods, softwoods, and composites. This versatile tool is designed for routing, grooving, and general stock removal, providing reliable and consistent results for professional applications.

Technical Specifications

Primary Applications

- Routing
- Grooving
- General Stock Removal

Cutting Edge Material	Tungsten Carbide Tipped (TCT)
Flute Configuration	Single Flute
Compatible Materials	Hardwoods, Softwoods, Composites

Performance Features

Key Performance Indicators
