

Single Gang Duplex Weatherproof Outlet Cover

This single-gang cover provides weatherproof protection for duplex receptacles. It is constructed from polycarbonate and ETL listed for wet and damp locations.

Product Overview

Weatherproof Protection for Electrical Receptacles

This single-gang duplex weatherproof outlet cover is engineered to provide reliable protection for outdoor electrical connections. Constructed from durable, UV-resistant polycarbonate, it effectively shields outlets from rain, snow, ice, humidity, and debris. Designed for versatility, it supports both vertical and horizontal mounting and features a self-closing lid to ensure a secure seal when not in use.

Construction & Materials

Durability Features

Impact Resistant • UV-Resistant • Corrosion Resistant • Non-conductive

Material Composition

GE Polycarbonate (PC)

Hardware Materials

Stainless Steel Screws, Stainless Steel Spring Leaf

Installation & Compatibility

Mounting Orientation

Vertical and Horizontal

Installation Notes

Factory installed gasket included for easy, reliable sealing

Compliance & Safety

Wet Location Rating

- Wet locations (cover closed)
- Damp locations (cover open or closed)

Certification

ETL Listed
