

Single Gang Electrical Wall Switch

This is a single gang electrical switch. It is suitable for controlling lights or other electrical appliances in residential or commercial installations.

Product Overview

Professional Single Gang Switch

This single gang electrical wall switch combines a durable plastic and iron frame construction with a sleek, user-friendly design. Featuring a large button interface and an integrated LED indicator, it ensures intuitive operation for residential or commercial lighting control. The standard 86x86mm form factor allows for straightforward screw-based installation.
