Product Overview

High-Performance Single Gang Switch

This 1-gang 1-way light switch is engineered for both residential and commercial lighting control applications. Featuring a robust integrated design for the middle frame and back housing, it offers increased structural strength and durability. The unit supports versatile installation with options for both screw terminal and screw-less (quick) wiring modes, making it compatible with various conductor types.

Construction & Design

Key Design Features

- Integrated middle frame and back housing
- Unique installation hook design for easy assembly
- Modular fitting design for mechanism integration
- Multiple color options available

Material Composition

High-quality PC, Silver point, Brass

Installation & Technical

Wiring Options

Screw Terminal • Screw-less Terminal

Installation Benefits

- Quick wiring mechanism
- Easy disassembly and assembly via hook design
- Modular fitting for easy connection
- Compatible with multiple conductor types
