

Single-Gang Weatherproof Electrical Outlet Cover

This single-gang weatherproof cover is designed to protect electrical outlets and GFCI receptacles in damp or wet locations. It is constructed from durable polycarbonate material and features a self-closing lid.

Product Overview

Reliable Outdoor Protection

This single-gang weatherproof outlet cover is engineered to provide robust protection for electrical receptacles in challenging outdoor environments. Constructed from high-quality, impact-resistant polycarbonate, it effectively shields against rain, snow, ice, and debris. With a self-closing lid and a factory-installed gasket, it ensures a reliable, watertight seal for both wet and damp locations.

Material & Durability

Material	Polycarbonate (PC)
Resistance Features	Impact Resistant, UV Resistant, Corrosion Resistant, Non-conductive
Hardware	Stainless steel screws and spring leaf

Compliance & Installation

Certification

ETL Listed

Installation Features

- Factory installed gasket included
- Vertical mounting compatible
- Horizontal mounting compatible

Suitable Environments

- Wet locations (cover closed)
- Damp locations (cover open or closed)

Design Features

Lid Mechanism	Self-closing lift lid
