

Single Girder Overhead Crane

This single girder overhead crane is compact lifting machinery designed in accordance with strict standards. Supporting the use of a standard electric hoist, it is suitable for workshop and warehouse material handling and large parts precision assembly.

Product Overview

European Single Girder Overhead Crane

This European-style single girder overhead crane is engineered for efficient and reliable lifting in industrial environments. Designed in strict accordance with FEM and DIN standards, it combines advanced technology with a compact, robust structure. It is an ideal solution for material handling in workshops and warehouses, as well as precision assembly tasks.

Technical Specifications

Rated Frequency

50 Hz

Frequency

60 Hz

Frequency

Working Level	A5
Power Supply	Three-phase AC
Rated Voltage Range	220V - 660V

Design & Compliance

Available Configurations

- General type
- Suspension type

Design Standards	FEM, DIN
------------------	----------

Applications

Typical Applications

Workshop material handling • Warehouse logistics • Precision assembly
