

Single Handle Faucet Ceramic Cartridge

This ceramic cartridge is designed for single-handle faucets. It features a durable ceramic disc that allows for smooth operation and precise temperature control.

Product Overview

High-Performance Ceramic Cartridge

This high-quality ceramic cartridge is engineered specifically for single-handle faucets, ensuring reliable performance and longevity. It features a durable ceramic disc mechanism that allows for smooth operation and precise temperature control. Constructed from high-grade plastic and ceramic materials, this component is built to resist wear and prevent leaks, making it an ideal choice for both replacement needs and new installations.

Technical Specifications

Material Composition	High-grade Plastic, Ceramic
Application	Single-handle faucets
Sealing Mechanism	Blue rubber gaskets for watertight seal

Key Features

Performance Benefits

- Smooth operation
- Precise temperature control
- Wear resistance
- Leak prevention

Compatibility

Universal Fit • Replacement Ready
