Product Overview

Professional Mask Cord Production

This single-head, 24-needle knitting machine is engineered for high-precision production of both elastic and non-elastic mask cords. Built for continuous operation, it features a robust frame and a reliable belt-drive system to ensure consistent cord tension and quality. It is an ideal solution for textile manufacturers looking for an efficient and durable unit for face mask component assembly.

Technical Specifications

Needle Configuration	24
Number of Heads	1
Drive Mechanism	Belt-drive system

Operational Features

Compatible Cord Types

- Elastic Mask Cords
- Non-elastic Textile Cords

Machine Capabilities	High-Speed, Continuous Production, Precision Knitting, Wire Tensioning System
Interface	Simple ON/OFF switch control
