

Single-Head Liquid Filling Machine

This single-head filling machine is designed for essential oils and other liquids. It offers filling speed up to 350 bottles per hour with precise volume control.

Product Overview

Versatile Liquid Filling Solution

This high-precision filling machine is designed for efficient liquid handling across various industries, including cosmetics and food production. It features adjustable volume settings and a durable construction, ensuring consistent results for containers ranging from 7ml to 5L. Built for reliability, this machine offers an intuitive interface that simplifies operation and maintenance for small to medium-scale production lines.
