

Single Horn Hammer with Steel Pipe Handle

This hammer features a single horn design for specialized tasks like shaping metal. The steel pipe handle offers excellent shock absorption and reduces user fatigue.

Product Overview

Versatile Professional Tooling

This single horn hammer is engineered for durability and versatility in demanding environments. Featuring a robust steel pipe handle, it offers superior strength and effective shock absorption to minimize user fatigue during extended use. The specialized single horn design is perfectly suited for intricate metal shaping, prying, and heavy-duty general repair tasks in construction and metalworking.

Key Features

Handle Material	Steel Pipe
Head Design	Single Horn
Model Number	JL0603

Applications

Suitable Industries	Construction, Metalworking, General Repair
