

Single Lever Water Mixer

This single lever mixer is a plumbing fixture for controlling water flow and temperature. It features a single lever handle for adjusting both hot and cold water with one hand.

Product Overview

Modern Single Lever Water Mixer

This high-quality single lever mixer offers seamless control over both water flow and temperature with its intuitive one-hand operation. Engineered for durability, it features a chrome-plated brass construction that provides excellent resistance to corrosion. Its minimalist aesthetic makes it a versatile solution for both bathroom and kitchen environments.

Technical Specifications
