

Single Needle Flatbed Lockstitch Sewing Machine with Unison Feed

This single-needle flatbed lockstitch sewing machine features a unison feed mechanism for even feeding of multiple material layers. It is designed for industrial applications, providing precise stitching and durability for demanding sewing tasks.

Product Overview

Industrial Precision Performance

This single-needle flatbed lockstitch sewing machine is engineered with a robust unison feed mechanism, designed to handle multiple layers of material with exceptional consistency. Built for industrial manufacturing environments, it ensures high-quality, precise stitching for demanding textile and apparel production. The durable construction provides reliable, long-term performance for heavy-duty sewing applications.

Technical Specifications

Feed Mechanism	Unison Feed
Number of Needles	1
Stitch Type	Lockstitch
Model Number	TY-0618-1

Key Features

Primary Advantages

- Uniform feeding of multi-layer materials
- High-precision stitching performance
- Durable construction for intensive use
- Reliable industrial-grade output

Applications	Apparel Manufacturing, Textile Manufacturing, Industrial Sewing
