

Single-Needle Post Bed Sewing Machine

This single-needle post bed sewing machine is designed for diverse sewing tasks. It features adjustable settings for stitch length and tension, ensuring optimal performance across different materials.

Overview

Precision Post Bed Sewing

The Single-Needle Post Bed Sewing Machine is engineered for versatility and precision in demanding sewing environments. Its robust construction ensures reliable performance, while the specialized post bed design facilitates easy maneuverability, making it ideal for reaching complex or difficult-to-access areas. With adjustable stitch length and tension settings, this machine provides consistent, high-quality results across a variety of materials, including footwear, leather goods, and upholstery.

Technical Specifications

Needle Configuration	Single-Needle
Bed Design	Post Bed

Features

Key Features

- Adjustable stitch length
- Adjustable tension settings
- Robust construction
- High maneuverability for complex areas

Applications

Ideal Applications	Footwear, Leather Goods, Upholstery
