

Single-Phase Dual Capacitor Aluminum Housing Motor

This single-phase motor features a dual capacitor and aluminum housing. It is designed for pumps, fans, and other machinery requiring reliable single-phase power.

Product Overview

High-Performance Aluminum Housing Motor

This single-phase dual capacitor asynchronous motor is engineered for reliable and efficient power in demanding industrial environments. Featuring a durable aluminum housing, the motor is optimized for excellent heat dissipation and long service life. Its high starting torque makes it an ideal solution for a variety of machinery including pumps, compressors, fans, and machine tools.

Technical Specifications

Motor Type	Single-Phase Asynchronous Induction Motor
Housing Material	Aluminum
Capacitor Configuration	Dual Capacitor

Compliance & Standards

Manufacturing Origin

Made in China

Certifications

CE

Application Suitability

Recommended Applications

- Industrial Pumps
- Compressors
- Industrial Fans
- Machine Tools
