

Single Pole 30A Molded Case Circuit Breaker

This is a molded case circuit breaker. It is a single-pole unit rated for 30 Amperes and designed for 124/240VAC operation with a 10kA interrupting capacity, suitable for residential and commercial use.

Product Overview

Reliable Circuit Protection

This single-pole molded case circuit breaker is engineered for consistent performance in both residential and commercial electrical systems. Rated for 30 Amperes, it provides essential overcurrent protection for 124/240VAC circuits. With a robust 10kA interrupting capacity, this unit ensures safety and reliability in standard electrical distribution applications.
