Product Overview

Professional HVAC & Refrigeration Contactors

These single pole definite purpose electrical contactors are engineered for reliable circuit control in air conditioning and refrigeration systems. Designed for demanding HVAC&R applications, the units feature robust construction and are compatible with various voltage and current ratings. Each unit undergoes 100% self-inspection and testing prior to shipment to ensure consistent quality for professional installation.

Technical Specifications

Performance Ratings

VAC	FLA	LRA
277	30	180
480	30	150
600	30	120

Resistive Amperage

40 A

Coil Voltage

208-240VAC at 50/60Hz

Installation Data

Torque Specifications

20 in-lbs

QC/TST Screws

40 in-lbs

Lugs
