

Single-Pole Miniature Circuit Breaker

This is a single-pole miniature circuit breaker (MCB) designed for residential and commercial electrical protection. It is rated for 230V AC and suitable for protecting lighting, power circuits, and other electrical equipment.

Product Overview

Reliable Circuit Protection

This single-pole miniature circuit breaker (MCB) provides essential overload and short-circuit protection for both residential and commercial electrical systems. Designed for efficient installation, it features a compact form factor suitable for standard DIN rail mounting. With clear markings for identification and wiring, it ensures safety and reliability for lighting and power circuits.

Technical Specifications

Rated Voltage	230 V
Rated Frequency	50 Hz
Rated Current	10 A
Standards Compliance	IEC60898

Design & Installation

Protection Features

- Overload protection
- Short-circuit protection

Mounting Type	DIN rail
Pole Configuration	Single-pole

Applications

Suitable Applications

Residential • Commercial • Lighting Circuits • Power Circuits
