

# Single Pole Power Distribution Block

Single pole distribution blocks facilitate efficient and safe electrical power distribution. Featuring robust construction, these blocks provide a reliable solution for connecting multiple circuits in electric power transmission and distribution systems.

## ADDITIONAL IMAGES

## Product Overview

### Professional Power Distribution

These single pole power distribution blocks are engineered for efficient and safe electrical distribution within power transmission systems. They feature a robust, compact design with a transparent cover for clear visibility of internal connections, ensuring easy inspection and maintenance. The blocks are versatile enough to be mounted on standard 35mm rails or direct mounting plates, offering flexibility for various electrical panel configurations.

## Technical Specifications

### Short-circuit Withstand (Icw)

**3 kA**

Short-circuit Current

**22 kA**

Peak Short-circuit

Voltage Rating

1000 V

Compliance

IEC60947-7-1, CE

## Installation & Features

### Mounting Compatibility

- 35mm DIN Rail
- Mounting Plates

Expandability

Yes

Contact Material

Tin-coated brass
