

Single Port GSM/CDMA/WCDMA Fixed Wireless Terminal

This fixed wireless terminal is designed for call termination and origination. It features a standard RJ-11 (FXS) port for connection to a telephone, VoIP gateway, or PABX system and supports caller ID and DTMF.

Product Overview

Professional Fixed Wireless Terminal

This single-port Fixed Wireless Terminal (FWT) provides a seamless bridge between cellular networks and standard telephone equipment. It supports a wide range of global frequencies, including GSM, CDMA, and 3G WCDMA, making it an ideal solution for areas with limited landline infrastructure. Designed for versatility, it integrates easily with standard RJ-11 interfaces, VoIP gateways, and PABX systems to ensure reliable voice communication.

Network Compatibility

Frequency Bands

- GSM 850/900/1800/1900MHz
- CDMA 800MHz
- 3G WCDMA 1900/2100MHz

Supported Networks

GSM, CDMA, 3G WCDMA

Technical Features

Advanced Capabilities

Caller ID • Callback Function • DTMF Support • 2nd Stage Dialing • CLIR Support • Anti-polarity Signal • IMEI Changer • IMEI Auto Rotate

Interface

Standard RJ-11 (FXS)

System Integration

System Compatibility

- Telephone sets
- VoIP Gateways
- PABX systems
