

Single Press Juicer with Plastic Housing

This household electrical appliance efficiently extracts juice from fruits and vegetables using a single pressing mechanism. It features a durable plastic housing, a clear container to observe the juicing process, and a separate container for juice collection.

Product Overview

Professional Grade Juicing Performance

This single press juicer features a modern, streamlined European-inspired design that complements any professional kitchen environment. Engineered with advanced food-grade materials and a high-performance motor, it ensures health, safety, and consistent reliability. Its specialized alloy cross-cut blade technology and efficient slag isolation system maximize juice yield for a premium extraction experience.

Technical Specifications

Operational Speed Levels

- 1
- 2

Blade Material	High-durability alloy
Control Modes	Pulse (P), Off (0), Speed 1, Speed 2

Safety & Construction

Safety Features

Food Hygiene Grade • Splash-proof inner cover • Dual protection system

Housing Material	Food-grade reinforced plastic
