

Single Row Diamond Grinding Cup Wheel

This single row diamond cup wheel is designed for efficient grinding and material removal. The durable diamond segments provide extended life and aggressive performance on concrete, stone, and masonry surfaces.

Product Overview

High-Efficiency Surface Preparation

The single row diamond grinding cup wheel is engineered for aggressive material removal and professional surface preparation. Designed for use with angle grinders, its robust diamond segments ensure long-lasting performance and reliable durability. It is an essential tool for achieving smooth, even finishes on a variety of masonry and stone surfaces.

Technical Specifications

Primary Applications

- Surface preparation
- Coating removal
- Material leveling
- General grinding

Grinding Operation	Dry grinding
Compatible Materials	Concrete, Medium Hard Granite, Soft Sand Stone, Roof Tile, Brick Block, Cured Concrete, Masonry
Tool Compatibility	Angle Grinder
