

Single Row Diamond Grinding Wheel

This diamond grinding wheel features a single row of diamond segments for efficient material removal. It is designed for use with electric tools on concrete, stone, and other hard surfaces.

Product Overview

High-Performance Grinding Solution

This single-row diamond grinding wheel is precision-engineered for efficient material removal on hard surfaces like concrete and stone. Its unique segmented design optimizes airflow to reduce heat buildup, ensuring extended tool life and consistent performance during operation. Ideal for professional surface preparation, edge grinding, and concrete leveling tasks, this wheel provides a smooth and reliable grinding experience.

Technical Specifications

Key Design Features

- Single row diamond segments
- Airflow-optimized segmented design
- Heat reduction technology
- Precision-engineered construction

Tool Compatibility

Electric Power Tools

Suitable Applications

Concrete Grinding, Stone Processing, Surface Preparation, Edge Grinding, Concrete Leveling
