

Single Screw Air Compressor

This is a single screw air compressor. It is designed for industrial applications requiring compressed air.

Product Overview

Industrial Efficiency

This industrial-grade single screw air compressor is engineered for continuous, high-efficiency operation in demanding environments. Constructed with robust materials, it ensures long service life and reliable performance for diverse industrial applications. The unit features an advanced control panel, allowing operators to easily monitor and adjust key performance parameters.

Technical Specifications

Rated Power

18.5 kW
Rated Power

Model Number

FHOGD-18.5F

Compressor Design

Single Screw, Industrial Grade, Continuous Duty

Features

Control System

- Performance monitoring
- Adjustable parameter settings
- Advanced interface
