

Single Shielding Mechanical Counter

This is a single shielding counter with a 200:1 rate. It is a mechanical counter that uses digit wheels to display numerical values.

Product Overview

Industrial Mechanical Counting Solution

The JSQ200 is a high-precision single shielding mechanical counter designed for demanding industrial environments. Featuring a robust metal housing, it provides reliable protection and shielding for internal components while ensuring accurate numerical tracking. Its integrated reset mechanism and efficient gear ratio make it an ideal choice for machinery monitoring and automated counting applications.

Technical Specifications

Model Number	JSQ200
Gear Ratio	200:1
Checker	1
Housing Material	Metal

Features

Capabilities	Mechanical counting, Shielded housing, Manual reset, Industrial grade
