

Single-Stage Centrifugal Water Pump

This single-stage centrifugal water pump is designed for water transfer, boosting, and circulation. It features a robust construction with a cast iron pump body and impeller for durability and long service life.

Overview

Robust Centrifugal Pump Solution

This single-stage centrifugal water pump is engineered for reliable performance in water transfer, boosting, and circulation tasks. Constructed with a durable cast iron body and impeller, it ensures long service life in demanding environments. It is an ideal choice for clean water applications across residential, commercial, and industrial sectors.
