

Single-Stage Snow Blower with 56cm Clearing Width

This single-stage snow blower is designed for clearing snow from driveways and sidewalks. It features a powerful engine and durable auger system for efficient snow removal.

Overview

High-Efficiency Snow Clearing Solution

This professional-grade single-stage snow blower is engineered for efficient snow removal on driveways, sidewalks, and patios. Powered by a robust 163CC OHV 4-stroke engine, it offers both manual and electric starting modes for reliable operation in cold climates. Its compact design combined with 5 forward and 2 reverse gears ensures superior maneuverability and ease of use for the operator.
