

Single System Computerized Flat Knitting Machine

This computerized flat knitting machine is designed for efficient and precise knitting operations. It features a single system carriage and a computerized control system for programmable pattern designs and automated adjustments.

Product Overview

Efficiency and Precision in Knitting

The GSJX-1-52 is an economic, single-system computerized flat knitting machine engineered for high-efficiency and precise knitting operations. It features an advanced computerized control system that allows for programmable pattern designs and automated adjustments, ensuring consistent quality across various knitted fabrics and garments. Designed for durability, its robust construction supports long-term performance, making it an ideal, cost-effective solution for small to medium-sized knitting businesses.

Technical Specifications

Model Number	GSJX-1-52
System Type	Single System
Control System	Computerized

Features

Key Capabilities

- Programmable pattern designs
- Automated adjustment capabilities
- Simplified knitting process
- Robust construction for durability

Ideal For	Small Businesses, Medium-sized Businesses, Garment Production, Fabric Manufacturing
