

Single Tank Piston Air Compressor

This piston air compressor is designed for industrial applications. It features a cast-iron pump and a single tank for compressed air storage.

Product Overview

Industrial-Grade Performance

This heavy-duty piston air compressor is engineered for demanding industrial applications requiring reliable compressed air. Built with a robust cast-iron pump, it ensures exceptional durability and a long service life under continuous operation. The unit is designed for portability and ease of use, featuring a maneuverable wheel-mounted design and integrated safety systems for worry-free operation.

Technical Specifications

Pump Configuration	Single-stage piston
Pump Material	Cast-iron

Features & Safety

Control Components

- Pressure regulator
- Pressure gauge
- Electric motor with cooling fan

Safety Mechanisms	Automatic shut-off valve, Pressure relief valve
-------------------	---

Design & Mobility

Mobility	Wheel-mounted
Tank Function	Efficient air storage
