

Single Temperature Chest Freezer with Butterfly Doors

This chest freezer features butterfly doors, which provide convenient opening and closing while minimizing the space needed for access. It is equipped with a thick foam door, 5mm glass door, and double seal for effective cold insulation.

Product Overview

Efficient Butterfly Door Freezer

This single-temperature chest freezer features a convenient butterfly door design that minimizes spatial requirements and reduces cold air leakage. Engineered with a high-density, microporous foam insulation layer, it ensures superior thermal retention and power efficiency. Its versatile construction allows it to function effectively as both a storage chest and a display cabinet.

Technical Specifications

Glass Door Thickness	5 mm
Insulation Technology	High-pressure foam, Microporous structure, Double seal

Design & Convenience

Core Features

- Butterfly door opening mechanism
- Seamless interior liner
- Antifrost water leakage protection
- Sinking groove door seal

Hygiene & Maintenance	Yes
