

Sintered Continuous Rim Diamond Saw Blade for Tile

This sintered blade features a continuous rim for smooth cuts on tile. It is suitable for wet or dry cutting of porcelain, ceramic, and other tile materials.

Product Overview

Precision Sintered Continuous Rim Blade

This sintered continuous rim diamond saw blade is engineered for high-precision cutting of ceramic and porcelain tiles. The design features a soft bond matrix to ensure fast, efficient cutting performance while maintaining tight tolerance control. Suitable for both wet and dry applications, this blade provides professional-grade durability and smooth, chip-free finishes for demanding tile installation tasks.

Key Features

Cutting Method

Wet Cutting • Dry Cutting

Suitable Materials

Ceramic Tiles, Porcelain

Technical Specifications
