

Sintered Turbo Cup Grinding Wheel

This grinding wheel is designed for efficient material removal and surface preparation. Its durable construction features a turbo rim for aggressive grinding and an extended lifespan on concrete, stone, and masonry materials.

Product Overview

Professional Sintered Turbo Cup Wheel

This sintered turbo cup grinding wheel is engineered for high-efficiency material removal and professional-grade surface preparation. Its specialized turbo rim design ensures aggressive grinding capabilities while maintaining a durable construction for an extended operational lifespan. It is an ideal solution for contractors working with concrete, stone, and various masonry materials to achieve a smooth and consistent finish.

Technical Specifications

Key Features

- Sintered construction for enhanced durability
- Turbo rim design for aggressive material removal
- Optimized for smooth and consistent surface finishing

Application

Surface Preparation • Material Removal • Professional Contracting

Compatible Materials

Concrete, Stone, Masonry
