

SIVACON 8PT Switchgear Assembly

The SIVACON 8PT switchgear assembly is designed for power distribution and motor control. Its modular design allows flexible configuration and easy expansion.

Product Overview

Industrial Power Distribution Solution

This modular switchgear assembly is engineered for reliable power distribution and motor control in demanding industrial and commercial environments. The system integrates essential electrical components including circuit breakers, relays, contactors, and busbars to ensure secure circuit protection and monitoring. Its highly flexible modular architecture supports customized configurations and facilitates easy expansion to meet evolving operational requirements.

Technical Features

Integrated Components

- Circuit breakers
- Electrical relays
- Contactors
- Busbars

Primary Applications

Power Distribution, Motor Control, Industrial, Commercial

System Design

Design Characteristics

Modular Configuration • Scalable Architecture • Flexible Layout
