Overview

Professional Six-Door Commercial Refrigerator

This six-door commercial refrigerator is engineered for high-demand food service environments, offering robust stainless steel construction and reliable performance. It features a versatile dual-temperature configuration, allowing for either freezing or refrigerated storage to meet diverse culinary requirements. Equipped with a digital temperature control system and high-efficiency compressors, this unit ensures consistent cooling while maintaining energy efficiency through its self-closing door design.

Performance & Build

Operational Features

- Digital temperature display and control
- Automatic self-closing door mechanism
- Adjustable shelving system
- Heavy-duty casters for mobility

Cooling System

Brand Compressor, Full Copper Internal Tubing, Dual Temperature Option, Integrated Foam Insulation

Storage & Design

Modular Storage Solutions

The refrigerator interior is optimized for commercial efficiency with a multi-tiered shelving system. The coated wire construction facilitates superior air circulation to ensure uniform temperature distribution, while the adjustable height functionality allows for the storage of various container sizes.
