

Six-Passenger Open-Air Electric Classic Car

This six-passenger electric vehicle features a classic car aesthetic and open-air design with a canopy. Its durable chassis, standard safety features, and quiet electric motor make it ideal for resorts and recreational facilities.

Overview

A Classic Transportation Solution

The LQL060 is a six-passenger electric vehicle designed with a distinctive classic aesthetic, perfect for resorts, parks, and recreational facilities. Its open-air design, complemented by a canopy for shade, provides a comfortable and stylish experience for passengers. Engineered for efficiency and quiet operation, this vehicle combines vintage appeal with reliable, modern performance.
