

Six-Seat Electric Patrol Vehicle

This six-seat electric patrol vehicle is designed for security and surveillance applications. Its compact footprint and zero-emission operation make it ideal for navigating confined spaces and environmentally sensitive areas.

Overview

Six-Seat Electric Patrol Vehicle

The LQX062 is a specialized six-seat electric patrol vehicle engineered for security and surveillance applications. Designed with a compact footprint and zero-emission electric powertrain, it offers quiet, efficient operation suitable for sensitive environments. Its durable chassis ensures stability, while the cabin prioritizes comfort and visibility for operational effectiveness.
