Product Overview

Professional Skewed Segment Grinding Wheel

This professional-grade diamond grinding wheel features a specialized skewed segment design engineered for aggressive material removal and efficient surface preparation. Constructed with a durable metal matrix and high-quality diamond segments, it is built to withstand the rigors of heavy-duty grinding tasks. The unique skewed geometry enhances airflow to reduce heat buildup, preventing glazing and ensuring consistent performance across both wet and dry applications.

Technical Specifications

Compatible Materials

- Concrete
- Stone
- Marble
- Granite

Certifications

MPA Hannover • ISO 9001

Manufacturing Techniques

Cold Press, Hot Press, High-Frequency Welding

Usage & Compatibility

Compatible Tools

- Angle Grinders
- Floor Grinding Machines

Application Types

Wet Application, Dry Application
