

# Skid Steer Concrete Mixer Loader

This skid steer concrete mixer loader is designed for mixing and transporting concrete on construction sites. Its compact design allows for maneuverability in tight spaces, while the robust mixing drum ensures efficient concrete preparation.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Concrete Mixing Solution

This skid steer concrete mixer loader is a robust and efficient machine designed for on-site concrete preparation and material transport. Featuring a compact footprint for maneuverability in tight spaces and a powerful hydraulic system, it ensures precision control during operation. Built for productivity, the unit offers easy access to major components for simplified maintenance, making it an ideal choice for small to medium-sized construction projects.

## Key Features

Engine Compatibility	Perkins, Mitsubishi, Xinchai
Control System	Pilot Joystick with Hydrocontrol for high sensitivity and accuracy
Maintenance Access	Easy access to major components via upper and back hood without moving loading arms

## Performance

Lifting Mechanism	Vertical lift for maximum capacity at height and reach
Hydraulic Pump	Permco Gear Pump

## Operator Comfort

### Cab Amenities

- Wider cab design (15-20% more room)
- Front door seal
- Anti-collision cage
- Seat belt
- Optional seat warmer
- Optional air conditioner

## Operational Efficiency

Attachment System

Hydraulic Couplers for fast and clean attachment changes
