

Skid Steer Loader

This compact skid steer loader is designed for versatile performance in construction, landscaping, and agricultural applications. It features a robust hydraulic system, providing ample power for lifting and attachment operation.

Overview

Versatile Performance

This compact skid steer loader is engineered for high-performance versatility across construction, landscaping, and agricultural sectors. Featuring a robust hydraulic system, it delivers significant lifting power and seamless attachment operation even in confined workspaces. The design prioritizes operator efficiency with a comfortable cab environment, intuitive controls, and a high-torque engine built for durability.

Performance

Top Speed

185 m/min

Top Speed

Model Designation

3185

Features

Suitable Applications

- Construction
- Landscaping
- Agriculture

Key Capabilities

High-Torque Engine, Robust Hydraulics, Compact Maneuverability, Durable Construction
