Overview

High-Performance Ditcher Attachment

This versatile skid steer loader ditcher attachment is engineered for demanding trenching applications in construction, landscaping, and utility projects. Featuring a high-torque digging chain and precision depth control, it delivers consistent results in diverse ground conditions. The robust design ensures durability and efficiency, while its compact footprint allows for seamless operation in confined spaces.

Technical Specifications

Performance Metrics

15 %

Cab Space Increase

Engine Compatibility

Perkins, Mitsubishi, Xinchai

Control System

Italy Hydrocontrol Pilot Joystick

Lift Mechanism

Vertical lift capability with US Permco Gear Pump

Features

Key Features

- Hydraulic quick-change attachment system
- Reinforced chassis for high stability
- Adjustable trench depth control
- Variable chain speed
- Easy-access maintenance hood

Operator Comfort & Safety

Anti-collision cage • Front door seal • Optional seat warmer • Optional air conditioner
