Overview

Versatile Skid Steer Loader

This skid steer loader is engineered for high performance in both construction and agricultural environments. Featuring a robust chassis design, it offers exceptional stability and comfort for demanding work conditions. The machine is built for efficiency, combining powerful engine performance with a vertical lift system to maximize productivity during load and carry operations.

Performance

Performance Highlights

15 %

Cab Space Increase

Lift Configuration

Vertical Lift

Operator Comfort

Cabin Amenities

Front door seal, Anti-collision cage, Seat belt, Optional seat warmer, Optional air conditioner

Control System

Pilot joystick with high sensitivity and accuracy

Maintenance & Efficiency

Efficiency Features

- Fuel efficient engine design
- Simplified inspection and filling points
- Quick-access major components

Maintenance Accessibility

Easy access via upper and back hood without moving loading arms

Attachment System

Hydraulic couplers for fast, clean changing
