Product Overview

High-Efficiency Snow Removal

This professional-grade snow blower attachment is engineered for skid steer loaders to provide high-performance snow clearing on roads, driveways, and parking lots. Built with a robust auger and impeller system, it effectively manages heavy snow accumulation even in demanding winter environments. The unit features an adjustable discharge chute for precise control and a heavy-duty frame designed to withstand the harsh conditions of winter maintenance.

Technical Features

Core Features

- Robust auger system for heavy snow breakup
- High-performance impeller for long-distance discharge
- Adjustable chute for controlled snow placement
- Heavy-duty frame construction
- Compatible with universal skid steer attachment interfaces
