

Skyscraper with Green Glass Facade

This is a skyscraper featuring a distinctive cylindrical structure at its apex. The building's facade is clad in green reflective glass panels.

Overview

Chongqing Oak International Trade Center

This prominent skyscraper is a landmark architectural project featuring a distinctive cylindrical structure at its apex. The building is characterized by a high-quality green glass facade that provides a reflective and modern aesthetic. Designed with a multi-level base and horizontal banding, the tower rises significantly above the surrounding skyline, offering a premium commercial presence.
