

Slab Casting Machine for Thin Strips

This industrial slab casting machine is designed for the production of thin strips. The system utilizes vertical casting molds and a network of hydraulic controls for high-volume manufacturing.

Product Overview

High-Efficiency Thin Strip Casting

This industrial slab casting machine is specifically engineered for the high-volume production of thin strips. Designed with a robust steel frame and precision-engineered vertical casting molds, the system ensures consistent material quality and operational reliability. Its advanced hydraulic and pneumatic control network provides manufacturers with the precision handling necessary for modern metal forming requirements.

Technical Capabilities

Casting Technology	Continuous Casting
Primary Output	Thin Strips, Metal Slabs

System Design

Core Components

- Robust steel frame
- Vertical casting molds
- Hydraulic control network
- Pneumatic control network
