

Slaked Lime Production System for Highway Construction

The slaked lime container is an indispensable machine in top grade highway construction. It facilitates the production of slaked lime for various applications.

Product Overview

High-Efficiency Slaked Lime System

This industrial-grade slaked lime production system is specifically engineered for highway construction applications, providing consistent material processing and reliable performance. With an integrated design featuring a hopper, conveyor, and mixing unit, the system ensures high throughput for continuous operations. Built for durability and ease of use, it features modular controls and robust structural support for demanding site requirements.

Performance Metrics

Production Capacity

20 t/h

Min Productivity

30 t/h

Max Productivity

Technical Specifications

Max Particle Diameter	200 mm
Gross Power	60kw-69kw
Gross Machine Mass	14 t

Features

Control System	Movable electric control cabinet, Optional air conditioner
----------------	--

Logistics

Lead Time	20 days
Packaging	Nude
