Overview

High-Precision Slant Bed CNC Lathe

This high-rigidity CNC lathe features a 45-degree slant bed design, engineered to provide superior stability, vibration damping, and efficient chip evacuation. Equipped with high-precision linear guideways and ballscrews, it delivers exceptional accuracy for turning, threading, and contouring operations. The machine is designed for industrial-grade performance, supporting versatile materials including steel, aluminum, and plastics.

Technical Specifications

Core Mechanical Components

- Linear Guideways (Taiwan)
- High Precision Ballscrews (Taiwan)
- Automatic Tool Turret
- Automatic Lubrication System
- Coolant System

Bed Angle	45 degrees
Spindle Unit	A2-5
Compatible CNC Systems	FANUC, SIEMENS, GSK

Certifications & Safety

Compliance

CE Certified

Safety and Maintenance

- Enclosed operator workspace
- Integrated chip conveyor
- Safety warning systems
