

Sleeve Anchor for Concrete

This heavy-duty sleeve anchor is designed for secure fastening in concrete, brick, and block. It features a split expansion sleeve for reliable holding power and a pre-assembled design for quick and easy installation.

Product Overview

Heavy-Duty Sleeve Anchor

This heavy-duty sleeve anchor is engineered for secure and reliable fastening into concrete, brick, and block substrates. Featuring a specialized split expansion sleeve, it provides superior holding power suitable for demanding structural applications. Its pre-assembled design ensures quick and efficient installation, making it an ideal choice for machinery mounting, structural supports, and general construction projects.

Technical Details

Compatible Materials

- Concrete
- Brick
- Block

Common Applications

- Structural supports
- Machinery mounting
- General construction

Installation Features

Pre-assembled, Quick Installation, Split Expansion Sleeve
