

Sleeve Shield Anchor for Concrete

This sleeve shield anchor ensures secure fastening in concrete, brick, and block. When tightened, the split sleeve expands, delivering a strong and reliable hold suitable for heavy-duty and permanent applications.

Product Overview

Heavy-Duty Fastening Solution

This metallic sleeve shield anchor is engineered for secure and reliable fastening in concrete, brick, and block substrates. It features a specialized split sleeve design that expands upon tightening to provide a superior, permanent hold. Built for heavy-duty applications, the anchor offers exceptional durability and robust resistance to corrosion.

Technical Specifications

Compatible Substrates

- Concrete
- Brick
- Block

Material Composition

Corrosion Resistant, Metallic

Performance

Application Scope

Heavy-Duty • Permanent Fixing
